

Client wallet management

What is it?

The client budget is where account money is transferred and campaigns are using it

When the master agency account is funded, the agency can allocate specific budgets to their sub-accounts.

[Support](#)

We deduct the amount from the agency master account and transfer it to the sub-account.

The money should appear in the other account in seconds.

Who can use it?

Only Agency type accounts with child accounts can use this feature.
