Eskimi Pixel Implementation via GTM

Integrating tracking pixels into your digital marketing campaigns is crucial for effective measurement and [optimization](#). If you're using Eskimi DSP for your advertising needs, this manual article will guide you through the process of implementing the Eskimi DSP tracking pixels seamlessly using Google Tag Manager (GTM).

Follow the step-by-step instructions below to efficiently set up the Eskimi DSP tracking pixels through GTM and ensure accurate tracking and measurement of your advertising efforts.

It is important to note that when implementing pixels, testing should be conducted in collaboration with the Eskimi support team. This will ensure accurate data collection, and validate whether the pixel is properly integrated with your website.

Audience pixel implementation

- Access your GTM account, and on the top left side of the page select **New Tag**
- Name the Tag according to the tag configuration and triggering
- Under Tag Configuration choose tag type - **Custom HTML** and paste the Eskimi DSP base (audience) tracking code
- Under Advanced Settings select Tag firing option - **Once per page**

Tag Manager | All accounts > ESKIMI DSP | business.eskimi.com

Activity History >

- Under the Triggering section choose a default trigger - All Pages (Page View)
- Once the Tag Configuration and Triggering is added, press Save

Conversion pixel implementation

- In order to implement Eskimi conversion tracking pixel, press **New Tag**
- Name the tag according to the tag configuration and triggering
- Under Tag Configuration choose tag type - **Custom HTML** and paste conversion tracking code.
- Under Advanced Settings select Tag firing option - **Once per page**

The screenshot shows the Google Tag Manager interface for the workspace 'business.eskimi.com'. The top navigation bar includes 'Workspace', 'Versions', and 'Admin' tabs. The main content area is divided into several sections:

- Left Sidebar:** Contains navigation links for 'Overview', 'Tags', 'Triggers', 'Variables', 'Folders', and 'Templates'.
- Top Bar:** Displays 'GTM-M4BGGJ7' and 'Workspace Changes: 1', with 'Preview' and 'Submit' buttons.
- Current Workspace:** A dropdown menu showing 'Default Workspace'.
- New Tag Section:** A card titled 'New Tag' with the text 'Choose from over 50 tag types' and a button 'Add a new tag'.
- Now Editing Section:** A blue card titled 'Now Editing Default Workspace'.
- Live Version Section:** A green card titled 'Live Version Version 17' with details about the published version and a button 'Latest version'.
- Workspace Changes Table:** A table showing the history of changes to the workspace.

Name ↑	Type	Change	Last Edited	User
Conversion	Trigger	Added	28 minutes ago	eskimi.analytics@gmail.com
- Activity History:** A button at the bottom of the workspace changes section to view more history.

- To finalise Eskimi conversion pixel implementation, under the Triggering section choose an existing trigger for conversion or create a new one. In the example below you can see the most common trigger for tracking conversions with success/thank you page url.

Submit the changes

Once you have set up the necessary pixels and triggers, the last and most important step is to submit the changes. Without submitting them, the changes will not be applied to the actual environment of the site. To do this, go to the overview page and look for the "submit" button in the top right corner. Click on the "submit" button and follow the process until all the recent changes are published on your website. This submission ensures that the modifications you have made will take effect and be visible in the live environment of your site.
