

# Screen Takeover

**Screen Takeover** is an HTML ad solution that expands and takes up the full screen of user mobile. The screen takeover happens only with user initiation. User has to click the ad to initiate

Live video execution: <https://bit.ly/3uyq6No>

## How Screen Takeover should be executed?

Screen Takeover should be executed only on **mobile**. Additionally, it can properly run only with **top-frame targeting** which is found in the approval page.

**Verification settings:**

☒ Verify on The Media Trust service

**Interstitial targeting:**

☐ Enable interstitial targeting

**Topframe targeting:**

☒ Enable topframe targeting

**Creative isolation settings:**

☐ Use frame wrapping

While, Screen Takeover is eligible on both **SSP** (Floating ad exchange) and **DSP**.

### **Screen Takeover SSP Campaign**

**Creative:** Dimension 1x1, Check "Tag is floating ad"

**Exchange:** Eskimi takeover, Took ID from the SSP team and crosscheck with your one.

**Campaign Setup:** Normal setup, No optimization and no Auto Optimization.

**CPM Rate:** Crosscheck the buying price with the SSP team. Don't trust the media plan.

**Approval Page:**

Advertisement category: Uncategorized, Uncategorized

App/Site Category: No need to select any

Brand Safety: No need to select any

Check "Enable topframe targeting"

Budget Pacing "None"

Check Allow multiple bids per user per second

Margin needs to be calculate wisely

---

## Limitations

**Screen Takeover CPM prices cannot be compared with floating ad** as the solution is different. Not all publishers allow full screen takeover this is why CPM will be higher.

**Publisher list will be limited** due to top-frame targeting. So it is necessary to test before execution. It is essential to not plan any whitelist targeting without initial tests.

Not all exchanges allow **top frame targeting** so traffic will be limited due to targeting specifics. Alcohol and betting ads will be eligible based on possible exchanges in the market.

When it comes to performance metrics Screen Takeover doesn't result in high CTR or low CPC. So it is purely **brand awareness solution**.
