# Campaign optimisation using app/site

We can optimise the campaign using app/sites.

How to do it ?

At first navigate to Tools -> Optimisation -> change the filter called "Optimise by" to "Optimise by app/site name". After coming to this page user will find the site/apps where the campaign is bidding.

The screenshot shows a web interface for campaign optimisation. At the top, there are buttons for Search, Filter (with a blue badge showing '4'), Export CSV, and Export Excel. Below this is a 'Filter' section with several dropdown menus: 'Campaign' (set to 'Opera'), 'Optimise by' (set to 'Optimise by app/site name'), 'Spent Base' (set to 'Spent based on cost'), and a date range '01 Jan, 2015 - 28 Sep, 2021'. There is also a 'Group by date' checkbox and a 'Clear All' link. The main part of the interface is a table with the following columns: ID, Title, Exchange, Bids, Impressions, Win rate, Views, Viewability, and Clicks. The table contains five rows of data for Opera-related apps, followed by a 'Total' row. At the bottom right of the table, there are controls for 'Rows per page' (set to 10) and pagination (showing '1-5 of 5' with navigation arrows).

ID	Title	Exchange	Bids	Impressions	Win rate	Views	Viewability	Clicks

Total:			52,128	50,084	96.08%	0	0.00%	92

Rows per page 10 1-5 of 5

If the user scrolls to right user will get few icons, there are three types of icon now.

- Circle - The site/app is not bidding and it is not possible to start bidding on this site/app from the optimisation page
- Play - The site/app is not bidding and user can start bidding on this site/app by clicking on the play icon
- Pause - The site/app is bidding and user can stop bidding on this site/app by clicking on the pause icon
