

# How to set up a campaign on Eskimi?

## Campaign requirements

1. **Target Audience.** Define your target audience based on interests and demographic criteria.
2. **Campaign Goal.** Identify the primary goal of your campaign, such as building awareness / generating clicks, *etc.*
3. **Key Performance Indicator (KPI).** Select campaigns' KPI that is most important for you. It can be: viewability rate, CTR/ clicks, engagement (depending on your creative type).
4. **Budget.** Determine the budget allocated for the campaign.
5. **Duration:** Decide the campaign's duration. If unsure, the Eskimi team can provide recommendations.
6. **Time scheduling.** Consider including time scheduling for your campaigns. For sensitive categories (e.g., alcohol, tobacco, betting), consider excluding morning hours in your time scheduling.
7. **Landing Page.** Ensure you have a fully functional landing page for directing campaign traffic. Test the page thoroughly, as its performance can impact campaign results.
8. **Tracking.** Check if your landing page includes an Eskimi tracking code. [Implementing](#) the Eskimi pixel enables first-party data collection (useful for retargeting), as well as tracking visits, sessions, and conversions (post click metrics). Full pixel integration is highly recommended for maximizing campaign potential.
9. **Brand safety.** If your campaign has brand safety as a KPI (uses 3rd party trackers to track it), make sure that you have keyword list prepared in advance.
10. **Creatives.** Plan campaign creatives according to campaign KPI, for example - Awareness: Use video, static, or custom rich media (RM) banners. Traffic: Use templated or custom RM banners. Viewability: Include display banners, particularly mobile-friendly sizes.
11. **Packages.** Think about where you want to show your ads (create a whitelist) or where you don't (create a blacklist). Packages could be used for campaign to be focused on specific inventory.

## Campaign setting up process

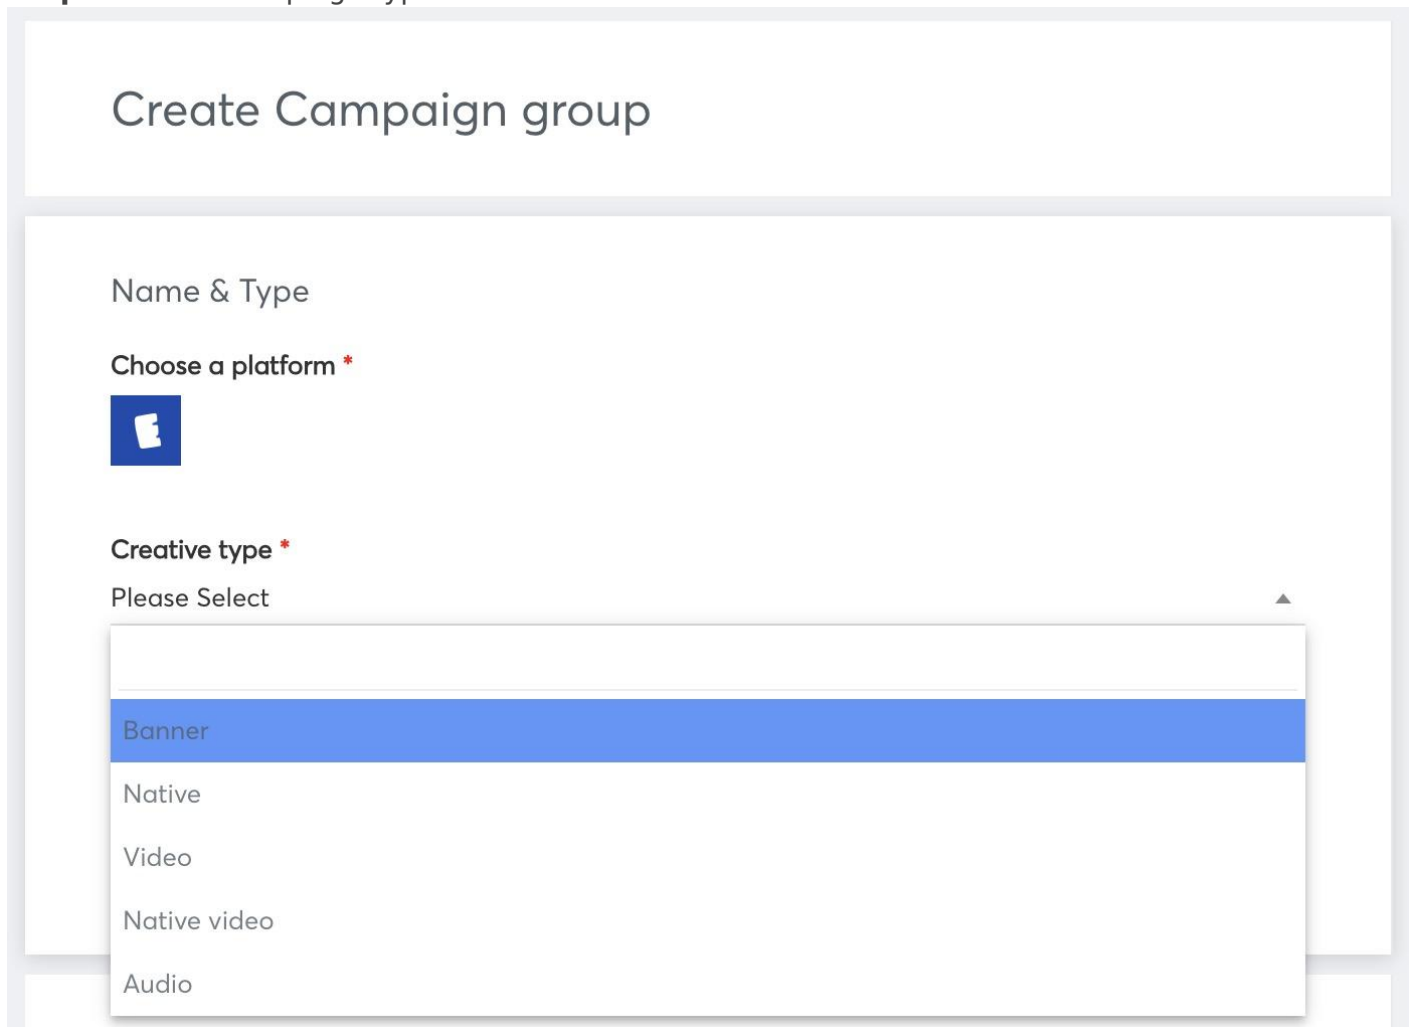

The following steps will help to learn how to set up a new banner ad campaign in 6 easy steps.

**IMPORTANT:** Before setting up your campaign, your creatives should already be uploaded and ready to use.

**Step 1:** Login to your DSP account, select Campaigns, and click on **New campaign group**.

**Step 2:** Select campaign type - banner.

**Step 3:** Write the name of your campaign.

**Creative type \***

Banner

**Campaign type \***

Display Ads

Campaign name

**Step 4:** Select one of these campaigns' goals. In this case we chose Awareness.

Campaign goal

Select a goal \*

Awareness

Traffic

Engagement

Other

**Step 5:** Select primary campaign objective, input planned value for it and press Save.

Primary campaign objective

CPM

vCPM

CPV

CPR

Pre-optimisation based on historical placement stats

Auto-Optimisation

**Step 6:** Select secondary campaign objective, input planned value for it and press Save. Set up auto-optimisation -> input Minimum impressions per placement to learn.

The screenshot shows a user interface for configuring a campaign. It is divided into two main sections: 'Secondary campaign objective' and 'Launch date & Budget'.

**Secondary campaign objective:** This section contains six buttons for selecting an objective: CTR, Viewability rate, Frequency rate, Session rate, ER, and CR. The 'Session rate' button is highlighted with a hand cursor. Below these buttons are two dropdown menus: 'Auto-Optimisation' and 'Impression capping' (which includes an information icon).

**Launch date & Budget:** This section includes a 'Date' field with a calendar icon, a link for '> Time and day scheduling', and a 'Budget Type' section with radio buttons for 'Total' (selected) and 'Daily'. At the bottom, there is a 'Total Budget' field with a red asterisk, currently showing '0' and a Euro symbol (€).

**Step 7:** Set up frequency by implementing impression capping

\*By default (7 impression 1 click within 24 hours per user).

\**Impression capping* means the number of impressions and clicks that a single user can see in a given time frame. In the example photo below we see that the user can view your ad a maximum of 2 times in 10 minutes and click on it once. You can make it less or more frequent depending on what you want to achieve: if your main goal is Awareness - you should make capping frequent, as frequent as 3 impressions in 5 minutes or so. If your main goal is Lead generation - you can make capping a little less frequent - maybe 1 impression in 20 hours or so.

## Impression capping

Default impression capping

Type Impressions Clicks  
User  #  #  Hours

**Step 8:** Select duration dates. Here you can set up time targeting (select specific hours of the day when your campaign should be displayed). Then choose budget type (total or daily). Based on your choice insert daily budget or total budget. Here you can set up Daily Budget Pacing. Finally, add Bid (CPM).

### Launch date & Budget

Start campaign after approval

**Step 9:** Select a country. Here you can also target users by city, states, audiences, demographics, languages, SEC (socio-economic class) groups, LSM (living standards measure) groups.

\*If you don't use any specific targeting, just leave default values in these options.

Location & Audiences

**Country \***  
Select any ▼

**Selected creative sets \***

Type for possible creative sets or press down to browse

## [How to set up Click to Action Landing Page](#)

If you're choosing a basic landing page, don't forget to include `https://` before your site name.

If it's an Android App download you'll have to enter your Google Play store ID

**Step 14:** Here you can set up 3rd party impression tracking for campaign.

Measurement

Additional impression tracking

Add Pixel/Javascript code

## Checking status of your campaign

Once campaign is launched you will be able to track your campaign status and the amount of money it spends by looking at Budget and Status, there are some statuses that can be shown:

<input type="checkbox"/>	31393	Pen.
<input type="checkbox"/>	20109	Dai.
<input type="checkbox"/>	31068	Live
<input type="checkbox"/>	30988	Sto.
<input type="checkbox"/>	14072	Rej.
<input type="checkbox"/>	20109	Del.
<input type="checkbox"/>	26113	Bud.
<input type="checkbox"/>	25758	Exp.
<input type="checkbox"/>	31393	Ready

- Pending campaigns are ready to be launched, they just need to be approved by admins.
- Expired campaigns are the ones that have already ended.
- Live campaigns are currently running.
- Ready means the campaign has already been set up and approved, however, its launch date is set to start in the future.
- Budget limit means the campaign has already used up all of its total budget and it cannot run anymore.
- The daily cap means the campaign has already used up all of its daily budget and is now paused until the next day.
- Stopped means that the campaign has been paused manually.
- Rejected means that the exchanges have rejected this campaign and prevented it from running because it did not meet the necessary requirements.

In the Budget section, you can see

- *Custom bid*
- *Budget daily*: on the left, it shows how much of the budget has been spending today, on the right - total daily budget.
- *Budget total*: on the left, it shows how much money has already been spent during this campaign, on the right - total budget.
