Traffic Discovery - Introduction

Traffic discovery is a tool, which allows checking the possible inventory based on various filters, such as:

- Countries
- Types (Apps/Sites)
- Platforms (Website, Android, iOS, etc.)
- Packages
- App/Site Name
- Placement Positions
- Placement Interstitial
- Creative Types
- Creative Sizes
- Operating Systems
- Browsers
- Operators

The image shows a web interface for filtering traffic data. It features a grid of 12 filter categories arranged in 3 rows and 4 columns. Each category has a title and a text input field with a dropdown arrow. The categories are: Countries, Types, Platforms, App/Site Name, Placement Positions, Placement Interstitial, Creative Types, Creative Sizes, Operating Systems, Browsers, Operators, and Period. A 'Clear All' link is located in the top right corner. A blue 'Search' button is positioned at the bottom left of the filter grid.

Filter				Clear All
Countries	Types	Platforms	App/Site Name	
<input type="text" value="Select countries"/>	<input type="text" value="Select types"/>	<input type="text" value="Select platforms"/>	<input type="text" value="Select app/site name"/>	
Placement Positions	Placement Interstitial	Creative Types	Creative Sizes	
<input type="text" value="Select placement positions"/>	<input type="text" value="Select placement interstitial"/>	<input type="text" value="Select creative types"/>	<input type="text" value="Select creative sizes"/>	
Operating Systems	Browsers	Operators	Period	
<input type="text" value="Select operating systems"/>	<input type="text" value="Select browsers"/>	<input type="text" value="Select operators"/>	<input type="text" value="Yesterday"/>	

Search

By applying different filters, it is possible to see what are the most popular creative sizes per specific App/Site, what are the most popular Apps/Sites that can be reached in specific country, what creative sizes are dominating across various platforms, and many more. This is a great tool when planning campaigns, trouble-shooting slow delivery or looking for insights what would help to reach more inventory and placements.

Traffic Discovery can be accessed by expanding Tools menu which can be found on the left side of the dashboard in dashboard menu.

When applying filters, the checkbox marks the filters for sorting result that you would like to see, when by choosing various selections in filters dropdown, it is possible to apply different filters. For example, if you would like to see Countries list, the checkbox next to “Countries” should be checked (ref. Example 01) and when you are seeking for App/Sites names in specific country – you should select specific country from Countries dropdown for filtering and mark the checkbox in App/Site Name – in this way, you will filter the inventory list in the country that you have selected under “Countries” filter (ref. Example 02).

Example 01:
